Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/518,464	Applicant(s) HUBER, ADALBERT	
	Examiner leszek b. kiliman	Art Unit 1773	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,3-11,14-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Winter'242.

The applied reference teaches the claimed invention substantially as claimed. See abstract, Summary of the invention, column 2, lines 33-42, column 3, lines 18-25, column 5, lines 25-33, column 6, lines 30-67, column 7-8.

The Winter'242 does not specifically teach the particle shape, pigments of claim 9, polymers of claim 11 and that polymer is applied to the particle surface by precipitation. However, it would have been obvious to one having ordinary skill in the art at the time of the invention to optimize particle shapes as well as pigments materials and polymer used for

composition since such would stabilize composition and improve mechanical properties of such composition. It would have been obvious design choice to select a specific method to apply polymer layer to the surface.

The amendments and remarks filed by Applicants have been fully considered. However, the examiner believes that the above rejections based on obviousness are proper. In response to the applicant's arguments the examiner submits that current claims have "comprising" language that is considered "open" to additional elements. Therefore, claims are not limited just to inorganic particles. Secondly, in column 4, lines 46-58 of the reference it is stated that pigments may be organic or inorganic. Such particles are considered coated by polymer having benzotriazole UV absorber.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to leszek b. kiliman whose telephone number is 571-272-1509. The examiner can normally be reached on M-T, 6.30-5.00.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
